### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Martin Moynihan on July 2, 2009.

The application has been amended as follows:

Please amend the paragraph starting on page 24, line 16, as follows:

In a preferred embodiment of the invention, the patient's body is less traumatized, as the spacer is narrow. Alternatively or additionally, the trauma of a prior art anterior is avoided by the use of a narrow spacer or by using a different surgical approach. It should be noted, that there is a wide, range of approaches that can be used and even an open surgical incision may be used, still reaping the benefits of not being required (or a lesser requirement) to sacrifice facet joints, muscles, ligament, blood vessels, spinal processes and/or other body structures.

Deleted: rang

Please amend the paragraph starting on page 52, line 1, as follows:

Figs. 6XIA-6XLB illustrate (using a side view, with an axial portion of the spacer removed) examples of weakening of spacer material to aid in achieving some exemplary spikes profiles of those shown in Figs. 6A-6K. The weakening illustrated are etching and/or cutting of material in a direction perpendicular to the spacer surface. However, weakening may also be achieved using other means, for example, chemical

or metallurgic treatment of by drilling small holes, for example in joints. Addition, the direction of the weakening may be at other orientations, for example along the surface of the spacer (as in Fig. 6XA) or at an angle thereto. Additionally or alternatively, the weakening and/or strengthening of the spacer is applied to provide a preferential distortion direction. Figs. 6XIA and 6XIB show a weakening pattern which aids in achieving a symmetric spike. Figs. 6XJA, ~~through 6XJD~~ show a weakening pattern which aids in achieving an asymmetric spike. Figs. 6XKA-6XKC show a weakening pattern which aids in achieving a flat top spike. Figs. 6XLA and 6XLB show a weakening pattern which aids in achieving an arc shaped spike.

Deleted: and

Deleted: 6XJB

The following changes to the drawings have been approved by the examiner and agreed upon by applicant: the Applicant agreed to label the two figures between 6XJA and 6XJB as 6XJC and 6XJD, respectively, so that they will not meet the requirements of Rule 84.

In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.
